

Gutter Installation and Repair

- **Description:** Gutters are crucial for directing rainwater away from the building's foundation.

Proper installation and maintenance prevent water damage and erosion.

- **Process:** Gutters are installed along the roof edges, ensuring proper slope for drainage. Repairs may involve fixing leaks, replacing sections, or cleaning out debris.
- **Cost:** New gutter installation typically costs between **\$5,000 to \$10,000 per 1,000 linear feet.**
