

Roof Repair

- Description: Roof repair involves fixing leaks, replacing damaged shingles, or addressing flashing issues. It's

essential for maintaining the roof's integrity and preventing further damage.

- Process: The specific area of damage is identified, and repairs are made, which may include patching, replacing materials, and applying sealant. Regular inspections can help catch issues early.
- Cost: Minor repairs may range from \$150 to \$500, while more significant repairs can cost between \$500 to \$1,500, scaling based on the area needing work.
