

# *Flat Roof Installation*

- **Description:** Flat roofs are often used in commercial buildings and require specific materials (like TPO, EPDM, or modified bitumen) that can withstand pooling water. They typically have a slight pitch for drainage.
- **Process:** The roof surface is prepared, and the chosen membrane is adhered or mechanically fastened. Proper flashing and drainage systems are installed to prevent leaks.
- **Cost:** Typically costs between **\$4,000 to \$10,000 per 1,000 square feet.**
